

LMU, Institut für Statistik, Ludwigstr. 33, 80539 München

Munich, 30.09.2021

The chair of “Statistical Learning and Data Science“ is looking for a

student assistant (8-12 h per week)

Your profile:

- You have good programming skills (preferably R) and are experienced with LaTeX
- You have prior knowledge in the field of **Machine Learning**, e.g., you have already taken the course “Introduction to Machine Learning”
- You are able to explain complex ideas in a comprehensive and concise manner
- You have a background in Statistics, Computer Science, Data Science, Mathematics, Physics, Econometrics, or a related quantitative field
- You have a reliable, independent way of working
- You have a good command of written and spoken English

You will:

- Assist with the creation of new lecture content and improving existing material
- Undertake material research (blog posts, books, papers, etc.)
- Create small code examples and demos to support the main claims of the lectures

We offer:

- Excellent opportunities to develop (you will learn a lot in the field of machine learning by researching for lecture material and through discussions with us)
- Get to know the working group and their research topics
- High flexibility (flexible working hours, etc.)

If you are interested, please send a CV and recent grade overview to:

Dr. Ludwig Bothmann
